The undersigned Owner, _____, of the property located at _____ SAN JOAQUIN _____ ("Property") and further described in the attached Exhibit "A", has, with the approval of SOUTH SAN JOAQUIN IRRIGATION DISTRICT ("District"), installed a flow meter to measure deliveries of District surface water to the Property. The District will use flow meter measurements to implement state law that requires the District to base its water charges, at least in part, on the quantity of water it delivers.

Owner consents to the entry of District officers, employees or agents ("District Personnel") on the Property for the purposes of inspecting, maintaining and reading the flow meter installed to measure deliveries of District surface water to the Property. District Personnel may enter the Property at any reasonable hour and on a monthly basis or at such other time as District reasonably determines to be necessary, to inspect the working condition of the meter, to maintain the meter and to record water usage. District shall also be permitted to enter the Property for the purpose of installing and maintaining telemetry control hardware to the meter such that the meter can be read remotely. District Personnel may enter the Property outside any District easement area using marked District vehicles on available access roads, on foot or as Owner and District may otherwise agree. District shall use reasonable care to avoid interfering with Owner's farming operations.

Owner agrees to take no action that would prevent the meter from accurately measuring the volume of District surface water delivered to Owner's Property.

This Consent shall remain in effect until such time as deliveries of District surface water to the Property shall terminate as evidenced by recordation of an Irrigation Service Abandonment Agreement signed by District and Owner or Owner's successor in interest.

This Consent shall run with the land described above and be binding on Owner and Owners' heirs, successors and assigns.
